Background

The Food Export Association of the Midwest USA (Food Export–Midwest) and Food Export USA–Northeast (Food Export–Northeast) are not-for-profit export associations whose primary function is to develop export markets for midwestern and northeastern (respectively) producers and processors of value-added food and agricultural products. Our members include state agricultural promotion agencies from thirteen midwestern and ten northeastern states.

Both groups are participants in the Market Access Program (MAP), a federal program handled by the Foreign Agricultural Service (FAS) of the U.S. Department of Agriculture. The MAP is intended to boost the export of value-added food and agricultural products from the U.S. through a partnership between FAS and approximately seventy-five other industry-based trade organizations. This includes primarily commodity-specific groups, as well as two other unaffiliated regional groups similar to Food Export–Midwest and Food Export–Northeast that handle the southern and western regions of the U.S.

The products covered for export promotion by Food Export–Midwest and Food Export–Northeast include a wide variety of processed and semi-processed products found throughout the retail, foodservice, and food processing sectors. These include products or derivations of meat, dairy, poultry, seafood, grains, fruits and vegetables, salty and savory snack foods, confections, beans, sauces and condiments, pet foods, beverages, canned foods, animal feeds, bakery products, pasta and many others. Marketing channels include mass market retail, specialty foods, convenience foods, private label, healthy/organic, food ingredients, frozen foods, and others. Additionally, Food Export–Northeast promotes benchmark seafood products from the northeastern U.S. including lobster, scallops, monkfish, Atlantic herring, squid, Atlantic mackerel, dogfish and skate.

Food Export–Midwest and Food Export–Northeast are independent organizations that have been engaged in a strategic alliance since April of 2000. Through this alliance, the strategy and tactics of the organizations have been aligned so that the activities and services of each group are very similar with differences based primarily on geographic focus. Food Export–Midwest focuses on midwestern exporters and a series of eight overseas target markets, including Australia/New Zealand, China, Hong Kong, Taiwan, Japan, Korea, Southeast Asia, and Mexico. Food Export–Northeast targets northeastern exporters and six overseas markets, including Europe, Central America, Canada, the Middle East, South America and the Caribbean.

By collaborating, the activities and services of each organization are open to participation by companies from the other region. The net effect is that exporters in the Midwest and Northeast have access to a larger range of export promotion opportunities, while the limited staffs at Food
Export–Midwest and Food Export–Northeast can focus on specific market development opportunities.

The states that are members of Food Export–Midwest include Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, Oklahoma, South Dakota, and Wisconsin. Food Export–Northeast encompasses Connecticut, Delaware, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont.

**Scope of Work**

Food Export-Midwest and Food Export-Northeast maintain a joint database hosted in our Association Management System (AMS) that is named NetFORUM. This AMS was designed to be customized using native tools built into the AMS for developing new interfaces or modifying the database structure and has been utilized for over a decade with many customizations developed by different vendors. It interfaces with our web site that utilizes IIS10 and a Content Management System (CMS) named Sitefinity.

The selected vendor would need to be familiar with our current software systems to be able to evaluate them and their integration ability.

They would also need to be familiar with other AMS, CMS, and software solutions so they can advise us of the best way to proceed in our technology as an organization.

**Objectives:**

Food Export-Midwest and Food Export-Northeast have a few goals and objectives for this project:
